

Prompt:

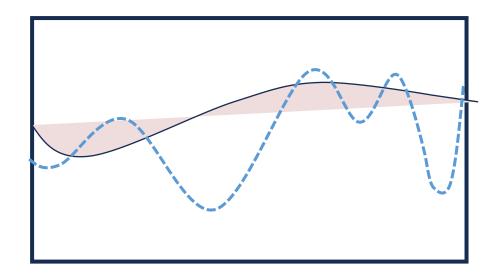

There are many useful manuals to guide the knob tuning processFor knob 'shared buffers' from Postgres, summarize the way to set the value for it in a sentenceThis sentence should be associated with concrete numbersas more detailed information if needed.

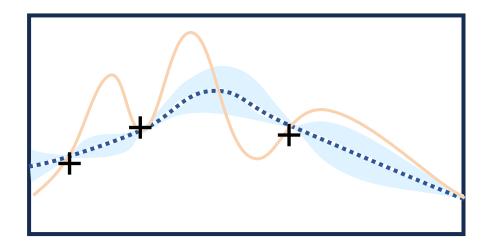

Answer:

Set the value for 'shared buffers' to about 25% of the available memory, but not more than 8GB, as it is the amount of memory reserved for caching data and indexes for the entire database system.

Knob Set
